AG ASSESSMENT

You are given the folder with many sub-folders.

Parent folder
—-15215 (child folder with post id as name)
—-----pictures… (jpg files)
—-----info.txt (format looks like this:
{"productId":"15838771","priceUSD":"130","totalFloors":"2",”floor”:
“1”,"bedrooms":3,"rooms":5,"area":"86.70 m²", address: “15 Pekini street”}

In floor field format is like this: “floor of flat / total floors of building”

You have to go to this page: https://www.myhome.ge/ka/my/addProduct and populate data that’s in the child folder. Fill in the fields with info.txt and upload all the pictures.

Acceptance criterias:

1. I, as a web scraper user, should be able to input flat type(1) somewhere in the code, transaction type(2), construction status (3), and paid services (4) which must be optional, so scrapper shouldn’t choose any if it is not provided. All the fields mentioned will be provided as index numbers. E.g 0 for flat type will mean first flat type in options etc…
2. Location field should be filled and then the first option from the dropdown should be chosen.

Account credentials that will be used for testing:
email: mega.tazuka@gmail.com
Password: Tazotazo1
Phone number: 574074289

ZIP of the sample parent folder will be provided. You should work with that folder as a sample.
